logic-less templates
separate views & templates
code in a real language

<http://mustache.github.com>

```
>>> import pystache
>>> pystache.render( 'Hi
{{person}}! ', { 'person': 'Mom' } )
'Hi Mom! '
```

```
import pystache  
class Simple(pystache.View):  
    def thing(self):  
        return "pizza"
```

Hi {{thing}}!

```
>>> Simple().render()  
'Hi pizza!'
```

{{variable}}

{{ {unescaped_variable} }}

{ { ! comment } }

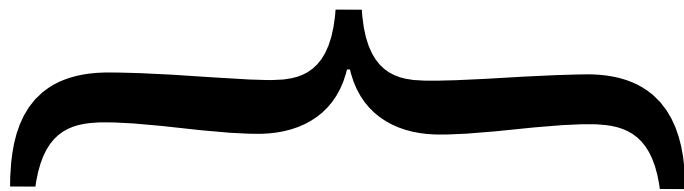

```
{{#section}}  
  {{section_variable}}  
{{/section}}
```

boolean show/no-show
loop over List/Array
call iterator
higher order function

```
{{^inverted_section}}  
    {{inverted_section_variable}}  
{{/inverted_section}}
```

```
{{variable}}  
{{>partial}}
```

Thanks!
